INTRODUCTION

1. This is the official register of all major launch operations conducted from Vandenberg Air Force Base, California. It includes the launches from the U. S. Naval Missile Facility, Point Arguello, before that installation was transferred to the Air Force and made part of Vandenberg Air Force Base.
2. Cumulative statistics are tabulated for ballistic, space and special programs by booster type and launch agency and have been coordinated with the Western Space and Missile Center (WSMC). Launch dates reflect Vandenberg local time.
3. Routine minor launches from Vandenberg AFB ground sites, such as airborne weapons, anti-aircraft missiles and meteorological rocketsondes are not listed in this summary. Separate statistical data on such launches can be obtained from the 1 STRAD Historian (1 STRAD/HO).
4. This summary replaces the Vandenberg AFB Launch Summary dated 1 July 1980. TEYOS/Scheduling will publish quarterly amendments to update this summary.
5. The Office of Primary Responsibility (OPR) is 1 STRAD/TEYOS, Autovon 276 - 5313 or 276 - 5893.

FOR THE COMMANDER

RICHARD O. KEEN, Lt Col, USAF
DCS/Test and Evaluation

GLOSSARY

AAM	Air-to-Air Missile
ABRES	Advanced Ballistic Reentry System
ABRV	Advanced Ballistic Reentry Vehicle (Formerly LBRV)
ACE	Advanced Control Experiment
ADC	Aerospace Defense Command
AEC	Atomic Energy Commission
AFSC	Air Force Systems Command (Air Research and Development Command (ARDC) before 1 April 1961)
AMARV	Advanced Maneuverable Reentry Vehicle
ANT	Advanced Nose Tip
ASM	Air-to-Surface Missile
ASTP	Army Special Test Program
Ballistic	Non-operational flight exercise involving ballistic reentry
CRL	USAF Cambridge Research Laboratories (before 1 April 1971, then incorporated into AFSC)
CTL	Combat Training Launch
DT&E PHASE I	Development Test & Evaluate (PHASE I Missile Functional Performance)
DASO	Demonstration and Shakedown Operation (Category III before 1 July 1963)
GG	Data Gathering
DMSP	Defense Meteorological Satellite Program
FTM	Flight Test Missile
EXOSAT	X-Ray Observatory Satellite
ERCS	Emergency Rocket Communications System (494L)
FOT	Follow-on Operational Test (Now OT Phase II) (Category IV before 1 July 1963)
HCM	Heat Capacity Mapping Mission
IRAS	Infrared Astronomical Satellite
IRBM	Intermediate Range Ballistic Missile
IRS	Interim Recovery System
IWST	Integrated Weapon System Training (RAF/SAC)
LBRV	Large Ballistic Reentry Vehicle (See ABRV)
MAGSAT	Magnetic Field Measurement Satellite
MINT	Miniaturized Instrumented Nose Tip
MOD	Modernized Minuteman (R&D, DASO) Operational tests are identified by the suffix "M" in the nickname
N/A	Not Applicable
NASA	National Aeronautics and Space Administration
NAVSTAR	Navig

NON-RELEASABLE INFORMATION DELETED
PER 8 NOV 83 AGREEMENT BETWEEN
REQUESTOR AND 4392 AEROSG/DAG

NDS	Navigation Development Satellite
NOAA	National Oceanic Atmospheric Administration
NT	Nike Target
NTS	Navigation Technology Satellite
OBLSS	Operational Base Launch Safety System
OSL	Ogden Special Launch
OT	Operational Test (Now OT Phase I) (Category III before 1 July 1963)
OT PHASE I	(See OT)
OT PHASE II	(See FOT)
PAS	Penetration Aids Study
PVM	Production Verification Missile
R&D	Research and Development (Category I & II before 1 July 1963)
RAF	Royal Air Force
RSLP	Reentry Systems Launch Program
SAC	Strategic Air Command
SALVO	Simultaneous launching of two or more missiles
SAM	Surface-to-Air Missile
SAMAST	Sandia ABRES Material Systems Test
SFT	Supplemental Flight Test
SM	Solar Mesosphere
SOT	Special Operational Test
SPACE	Orbital space operations
SPACECRAFT	Prototypes launched in non-orbital tests
SPACEPROB	Non-orbital space operations
ST	Special Test
STM	Special Test Missile
STP	Space Test Program
STREP	System Technology Reentry Experiments Program
TARGET	Missile target for surface-to-air/air-to-air missile firing practice
TAT	Thrust-Augmented Thor
TDV	Technology Development Vehicle
TIP	Transition Improvement Program
TREP	Thrusted Replica
TP	Test Pad

NOT-RELEASABLE INFORMATION DELETED
PER 8 NOV 83 AGREEMENT BETWEEN
REQUESTOR AND 4392 AEROSG/DAD

Military Uses of Space: 1946-1991

Published by:

Chadwyck-Healey Inc., 1101 King Street, Alexandria, Virginia 22314

Military Uses of Space: 1946-1991 provides a detailed record of the strategic importance of the U.S. military space program from the conceptualization of the uses of space to the present realization of advanced capabilities. Materials were identified, obtained, assembled, and indexed by the National Security Archive, a non-profit, Washington, D.C. based research institute and library. The microfiche collection is accompanied by **Military Uses of Space: 1946-1991 Guide and Index**.

Arrangement of Information on the Microfiche:

The documents are arranged in chronological order. A unique identification number is assigned to each document. Each new document begins a new line on the microfiche.

Document Quality:

The quality of the original material varies. In the case of each document, Chadwyck-Healey Inc. has filmed the best copy made available by the National Security Archive.

Microfiche Numbering:

The unique identification numbers assigned to the documents are listed in the top right hand corner of the microfiche title strip.

Technical Data:

Producing Laboratory: Chadwyck-Healey Inc.

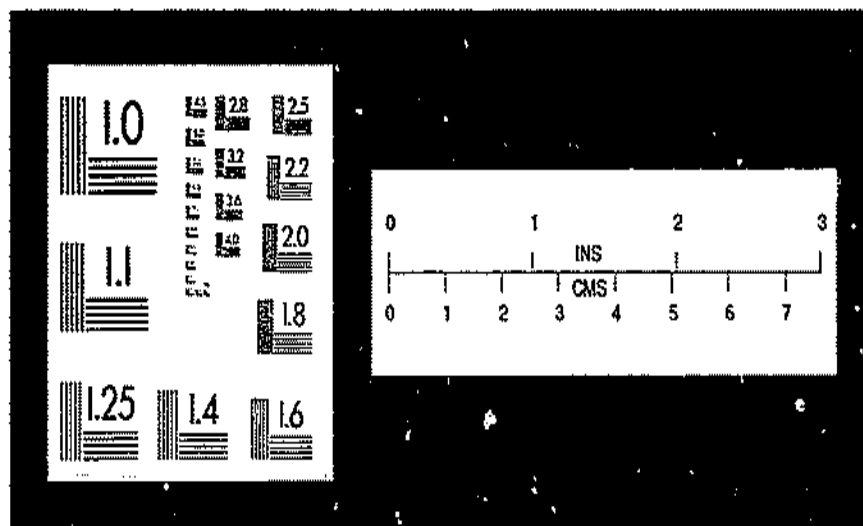

Date of Publication of Microfiche Edition: 1991

Format: 49 frame, 105mm x 148mm silver halide microfiche, 24x nominal reduction

The arrangement of the pages on microfiche is the property of Chadwyck-Healey Inc. Paper copies of the arrangement of pages on microfiche may be made without the written permission of Chadwyck-Healey Inc. for internal and reference use only and not for resale.

Distribution Outside the USA:

Chadwyck-Healey Ltd., Cambridge Place, Cambridge CB2 1NR, England

Document Quality:

Through the use of the Freedom of Information Act and an extensive network of government, media, and academic contacts, the National Security Archive has developed this varied collection of primary materials. Just as the type of materials included varies, so does the quality of each document.

The National Security Archive has made every effort to provide Chadwyck-Healey Inc. with the best quality, most complete copy available of each document. Chadwyck-Healey Inc. has faithfully reproduced on microfiche exactly what was provided by the National Security Archive.

Many of the documents included in this publication were previously classified by the U.S. Government and even when declassified, sections or pages may be obliterated by the government due to the potentially sensitive information contained in them.

The variety of material reproduced in this publication includes photocopies or poor carbon copies of cables, memoranda, intelligence reports, briefing papers, Congressional reports, official letters, and press reports. This variety can present difficulties of image and contrast which the most careful filming and processing cannot entirely overcome.

This is a rich and varied source of primary documents made available for research and all microfiche have been produced to the highest quality and conform to AIIM, BSI and ANSI standards.

NON-RELEASABLE INFORMATION DELETED
PER 1994 AGREEMENT BETWEEN
REQUESTOR AND 4392 AEROSG/DAD

Military Uses of Space: 1946-1991

Published by:

Chadwyck-Healey Inc., 1101 King Street, Alexandria, Virginia 22314

Military Uses of Space: 1946-1991 provides a detailed record of the strategic importance of the U.S. military space program from the conceptualization of the uses of space to the present realization of advanced capabilities. Materials were identified, obtained, assembled, and indexed by the National Security Archive, a non-profit, Washington, D.C. based research institute and library. The microfiche collection is accompanied by **Military Uses of Space: 1946-1991 Guide and Index**.

Arrangement of Information on the Microfiche:

The documents are arranged in chronological order. A unique identification number is assigned to each document. Each new document begins a new line on the microfiche.

Document Quality:

The quality of the original material varies. In the case of each document, Chadwyck-Healey Inc. has filmed the best copy made available by the National Security Archive.

Microfiche Numbering:

The unique identification numbers assigned to the documents are listed in the top right hand corner of the microfiche title strip.

Technical Data:

Producing Laboratory: Chadwyck-Healey Inc.

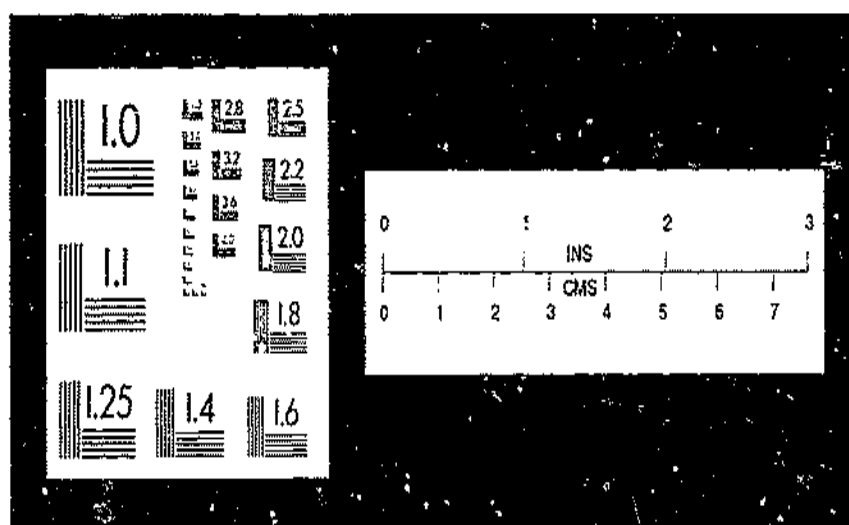

Date of Publication of Microfiche Edition: 1991

Format: 49 frame, 105mm x 148mm silver halide microfiche, 24x nominal reduction

The arrangement of the pages on microfiche is the property of Chadwyck-Healey Inc. Paper copies of the arrangement of pages on microfiche may be made without the written permission of Chadwyck-Healey Inc. for internal and reference use only and not for resale.

Distribution Outside the USA:

Chadwyck-Healey Ltd., Cambridge Place, Cambridge CB2 1NR, England

Document Quality:

Through the use of the Freedom of Information Act and an extensive network of government, media, and academic contacts, the National Security Archive has developed this varied collection of primary materials. Just as the type of materials included varies, so does the quality of each document.

The National Security Archive has made every effort to provide Chadwyck-Healey Inc. with the best quality, most complete copy available of each document. Chadwyck-Healey Inc. has faithfully reproduced on microfiche exactly what was provided by the National Security Archive.

Many of the documents included in this publication were previously classified by the U.S. Government and even when declassified, sections or pages may be obliterated by the government due to the potentially sensitive information contained in them.

The variety of material reproduced in this publication includes photocopies or poor carbon copies of cables, memoranda, intelligence reports, briefing papers, Congressional reports, official letters, and press reports. This variety can present difficulties of image and contrast which the most careful filming and processing cannot entirely overcome.

This is a rich and varied source of primary documents made available for research and all microfiche have been produced to the highest quality and conform to AIIIM, BSI and ANSI standards.
